'MINAIR' DIVE CONTROL PANELS

▶ Popular & portable ▶

Economical ▶ Ideal for onshore use 'MINAIR' DIVE CONTROL PANELS, a popular range, have been produced in response to demand for a good quality economical system suitable for use in systems requiring portability. These panels are not the rugged steel frame units as successfully used over a number of years by the major offshore diving companies, but instead are more suited to the onshore industry where weight and size are important criteria. Even so, the 'Minair' panel is still designed to take the hardest knocks with its engraved fascia and fibreglass box. Shown (above) is the new robust fibreglass case, now fitted as standard to Minair Panels. The 'traditional' ply box (shown right) is still available upon request.

SPECIFICATION

01. Pneumo Gauges 6", 0-230fsw/msw Dual Scale 1/4% Foundrometers
02. HP Regulation Gauge (Max WP), 4,000psi (where applicable)
03. LP Supply Side Gauge (Max WP), 200psi
04. Pipework (Tungum)
05. Valves (Brass)
06. Relief Valve
07. Supply Gauges
08. HP Inlet size (JIC 4, where applicable)
09. Pneumo Connection (JIC 4)
10. LP Supply (JIC 6)
11. Diver Supply (JIC 6)

HOW TO CHOOSE YOUR 'MINAIR' PANEL

Minair Model	No. of divers	No. of HP Regs.	No. of LP Inlets	No. of HP Inlets	Size	Weight (Kg)
1000 (Pneumo box)	1	0	0	0		
1010	1	0	1	0		
2010	2	0	1	0	650x430x210	17
2020	2	0	2	0	650x430x210	17
2030	2	0	3	0	650x430x210	17
2111	2	1	1	1	650x430x210	19
2112	2	1	1	2	650x430x210	19
2212	2	2	1	2	650x430x210	21
3111	3	1	1	1
